18		

## Task 3

19	known why Lisa leave
20	put off +
21	my business
22	were many things

In my opinion one of the greatest inventions of all time is Leonardo Da Vinci. He is artist, scientist, inventor, writer, musician.

If I have a chance to travel to any epoch and interview any inventor I would travel to fifteenth century. It would be the greatest day in my life. I would ask Da Vinci about his life. How he can combine all business? Was it hard for him to study? And so on. And of course I would say that he will be great man in the future. I would ask how he invented all his machines and at the same time be still a musician and an artist because it's very difficult. I don't know a lot of things about Da Vinci but I know him how as great artist. And I would ask him about some secrets in drawing. After all my questions he may ask me too about future. And I would be happy to tell him about it. I would try to tell everything I know.

I like to represent how it would be. But I'm sure that he would not stint on the answers.

A lot of people dream about travelling to any epoch. Everyone once thought that he wants to meet someone from the past. What about me, I would choose Mendeleev. In my opinion he was the most popular scientist ever.

The first reason for his opening of the system of Mendeleev.

Actually, this is one of the main discovery in chemistry. Of course, I would like to know how he managed it.

Sometimes people say that the table was a dream for him at night.

Perhaps, it is true. I would like to learn it from him.

Also he could explain to me some things in chemistry that I do not understand. In my view, he would be a good teacher.

In conclusion I would say that Mendeleev was the greatest scientist and inventor of all times.

He did a lot for the our future and if I had the opportunity to travel to any epoch I would not hesitate to choose him.

Let's start with the fact that if I was in the 18th century, I would like to meet with Michael Lomonosov. Many people think that he influenced evolutionary theory. I would like to ask him if that's true and what exactly were his merits? Were your discoveries difficult and how long did you go to them?

It is generally agreed today that evolution has had strong impact on us. The merits of each of the great scientists impact on our future. One can not deny that it is very hard work. I would ask about how he lived, what he liked to do in his free time? I think he liked to travel. I would ask what his favorite places were.

To draw the conclusion one can say that this meeting would be important for me. I am interested in.

If I will do to travell in 19th century I will do meet with Mendeleev, a Russian scientist and chemist. Because I am study a chemistry and I would like to tie with it my life. I will be happy meeting with him. He is a great discovery of chemical substances table.

I will do to set questions binding with a chemical substances table. Firstly, why he decided tie with chemistry him life? Secondly really idea creating him a table occurred when he sleeped? Third, he has whether some an invention or a discovery about which he not telled. More I would like to set questions binding with personal Mendeleev's life. I am interesting about him childhood.

It meeting will important for me. Because I am interesting a scientific discovery and studying chemistry. I would like not only to set questions, but, for example, to be his laboratory. Mendeleev was outstanding scientist and chemist.
